

Folding Wing Panel Replacement Instructions (metal tops and 7 adjustment holes)

Step 1: **Remove Old Folding Panel/Wing.** Open folding table to full open position. Lock casters to prevent table from moving during installation of replacement parts. (Figure 1)

Step 1A: With both hands, push in adjustment pins and slide out wing to its widest adjustment hole. (Figure 2)

Step 1B: Flip plastic panel over to the closed position. With one hand slide Folding Panel towards you while lifting middle of hinge area with your other hand. Keep lifting until metal pin underneath Folding Panel pops out of its slot. (Figure 3) **CAUTION:** If this process is not followed correctly, there is a risk of breaking off the metal pins.

Step 1C: Repeat on opposite side of Folding Panel to remove entire wing.

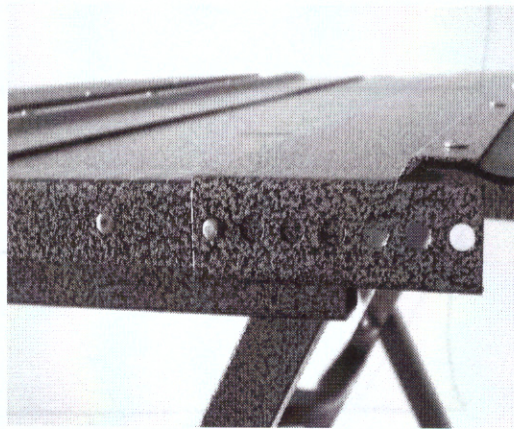

Figure 2

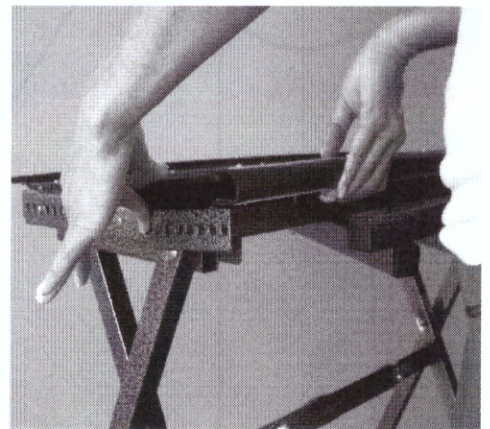

Figure 3

Step 2: **Install New Folding Panel/Wing.** Note Figure 4 to identify 2 slots in metal for the 2 metal pins on underside of Folding Panel to pop into. Using both hands, place Folding Panel in position shown. (Figure 6)

Step 2A: Flip plastic panel over to closed position. Using one hand to push in adjustment pin and your other hand to lift middle area of wing. While lifting middle area, push Folding Panel until metal pin pops into its slot. (Figure 5) **CAUTION:** Again, if this process is not followed correctly, there is a risk of breaking off the metal pins.

Step 2B: Repeat on opposite side of Folding Panel to complete installation.
